## **JOINT SERVICES ELECTRONICS PROGRAM**

### **OVERVIEW**

This final report on the Joint Services Electronics Program, Contract F49620-91-C-0028, covers the three year period 4/1/91 through 3/31/94.

During this period thirteen research projects were supported under this program in the areas of Solid State Electronics, Quantum Electronics, and Information Electronics. During this period, Prof. S. R. Forrest left the program and was replaced by Prof. R. Nottenburg. The three year period has been a very productive one from the scientific results achieved and the transfer of the results to industry and government laboratories. The results are documented in the 93 scientific publications that have resulted from this research. Perhaps the best mode of technology transfer is through students who graduate and carry the technology with them to other laboratories and industry. Thirty one students who were supported by JSEP received degrees during this period.
